Led lamps with any type of socket based on Filament led that have a light pattern like old lamps and energy lamps so housing make no fun with light. 120 Lumen / W output saves costs in power.

Solar street lamps have a solar panel + battery + electronics to operate for many years with no service and maintenance. We have many systems used in Kenya for 5 years with no service demands. Battery is an advanced lithium battery that can be charged at 60C and operate for over 5000 cycles. We have several sizes from 8 MW forecourt yard lamps to large solar street lamps of

160W in power. During 2016 we plan to start up assembly in Kenya.
